

2017 Pacific Northwest Water Research Symposium

Hosted by the Oregon State University Hydrophiles

The Pacific Northwest Water Research Symposium is a two day student-centric conference highlighting outstanding student research in the fields of water resources science, engineering, and policy. The conference aims to connect individuals, build skills, and share knowledge between students, university faculty, staff, and professionals. Students, both graduate and undergraduate, travel from universities in Oregon, Washington, and Idaho to present their research.

The Oregon State University Hydrophiles student group invites you to become a for the seventh annual **Water Research Symposium**, being held March 6th and 7th, 2017. We offer a diverse program to attendees, which is only possible through the generous sponsorship of organizations like yours.

Your support will foster the success of the following activities at this year's symposium:

- Oral and poster presentation sessions on freshwater resources research conducted by students
- Student Travel Grants
- Facilitation of professional skill-building workshops
- Afternoon networking reception and keynote speaking event
- Mentorship meetings with private and nonprofit water resources professionals
- Event space and catering expenses

Best regards,

The 2017 Water Research Symposium Team
